Midway Guide for Guests

RIDE SAFETY

Safety is our Number One priority at North American Midway Entertainment -- safety for our patrons and safety at the workplace. Many rides on the Midway are spectacular and thrilling and each rider should be aware of their own limitations. If you have a pre-existing condition where your health could be at risk we encourage you not to ride. We base all safety on recommendations from the manufacturer and our Safety Director. The safety of riders and those around you is paramount.

Guests with the following health concerns should heed all warning signs and ride at risk:

- Heart trouble/high blood pressure
- Neck/back issues
- Pregnant

RIDER SAFETY RESPONSIBILITIES

All Passenger restraint systems, including lap bars, shoulder harness and seatbelts, must be positioned, fastened and tightened to allow guests to ride. We are required by the State of Oklahoma to enforce all manufacturer requirements.

All rides have safety systems designed by the manufacturer to accommodate people and most are based on average physical stature. Safety restraints may place restrictions on the ability of an individual to safely experience the ride. Extremely large or small individuals may not be safely accommodated by these systems. For example, height requirements are based on the size needed for safety restraints to function properly. Due to different body proportions it is not possible to list exact size and weight. Our Guest Services booth is onsite and can assist with any concern.

CAST AND BRACES

Guest with casts and braces will be restricted from riding if the cast or brace will not fit inside the ride unit and/or presents hazard to the guest or others. Guest with full arm (elbow restricted) and full leg (knee restricted) casts or braces are restricted from most rides on the Midway. Our Guest Services booth is onsite and can assist with any concern.

YOUR SAFETY IS OUR NUMBER ONE CONCERN!
